OUR COMMITMENT TO HEALTH AND SAFETY

We are excited to return to providing dental specialty care in the areas of Oral & Maxillofacial Surgery, Prosthodontics, and Oral Pathology/Oral Medicine.

In these times of uncertainty, many of our professional colleagues are returning to their offices with a “business as usual” approach to patient care. However, we believe that a slower, more calculated approach would ultimately be safer for our patients, families, and staff.

Our practice has always taken every precaution to keep patients and staff safe and healthy. We have always adhered to and exceeded the standards for decontamination set by OSHA. Furthermore, we are incorporating the latest guidelines set forth by the CDC and other professional organizations.

For the foreseeable future, we will be adjusting our consultation and patient treatment hours, and even decreasing our overlap time with the Advanced Endodontics group that shares space in our office. This will help reduce patient volume and traffic through office and limit unnecessary patient interactions.

MEASURES WE ARE TAKING TO FURTHER PROTECT OUR PATIENTS

- Change patient scheduling
 - Decrease consultation times
 - Spread consultation and treatment appointments further apart between patients
 - Limit the number of patients in our office at any one time
 - Limit visitors and patient guests from entry to office
 - Close reception area until it is safe for family members and patients to congregate together again
 - Select evening hours by appointment
 - Select weekend hours by appointment
- Screening of staff
- Screening of patients
 - Telephone screening
 - Obtaining initial records (x-rays/models/photos if available) from referring dental office
 - Temperature checks
 - Rescreening on day of appointment
- Tele-Dentistry/Virtual Consultations
- Limiting / Postponing certain elective/non-urgent procedures
- Implementing air-purification / HEPA filtration systems throughout the office
- All staff will wear masks while in the office
- Practicing social distancing wherever possible within the office
- We encourage all patients to wear masks except while undergoing examination or treatment
- Continue to use the highest standards for instrument disinfection and sterilization
- Continue to use hospital grade disinfectants to clean, disinfect, and prepare the treatment operatories for safe use
- Take every available precaution when using PPE including: N95 Masks/Respirators, Goggles, Face Shields, Surgical Gowns, and Gloves

At Premier Oral & Facial Surgery we appreciate the ongoing support from our patients, referring providers, families, and friends. Thank you for your patience and cooperation while these measures are put into effect.

For questions or clarification about these measures, please contact us at (407) 553-2894
